

BIM FOR BRIDGES AND STRUCTURES

TPF-5(372)

ROADMAP

BACKGROUND

The desired outcome of the work under the TPF-5(372) Project is to establish a standard for bridge semantic and geometric information that is common in the United States, which is a continuation of a previous effort known as the IFC Bridge project to create international standards. The resulting products from the TPF-5(372) may be used by States as a baseline for future projects to further refine standards at the local level. The work under this project will be conducted in a series of activities in a five-year timeline to accomplish four major goals:

- OUTCOME 1:** Development of Information Delivery Manual (IDM)
- OUTCOME 2:** Creation of Model View Definitions (MVD)
- OUTCOME 3:** Development of Software Certification Materials
- OUTCOME 4:** Deployment of Stakeholder Training

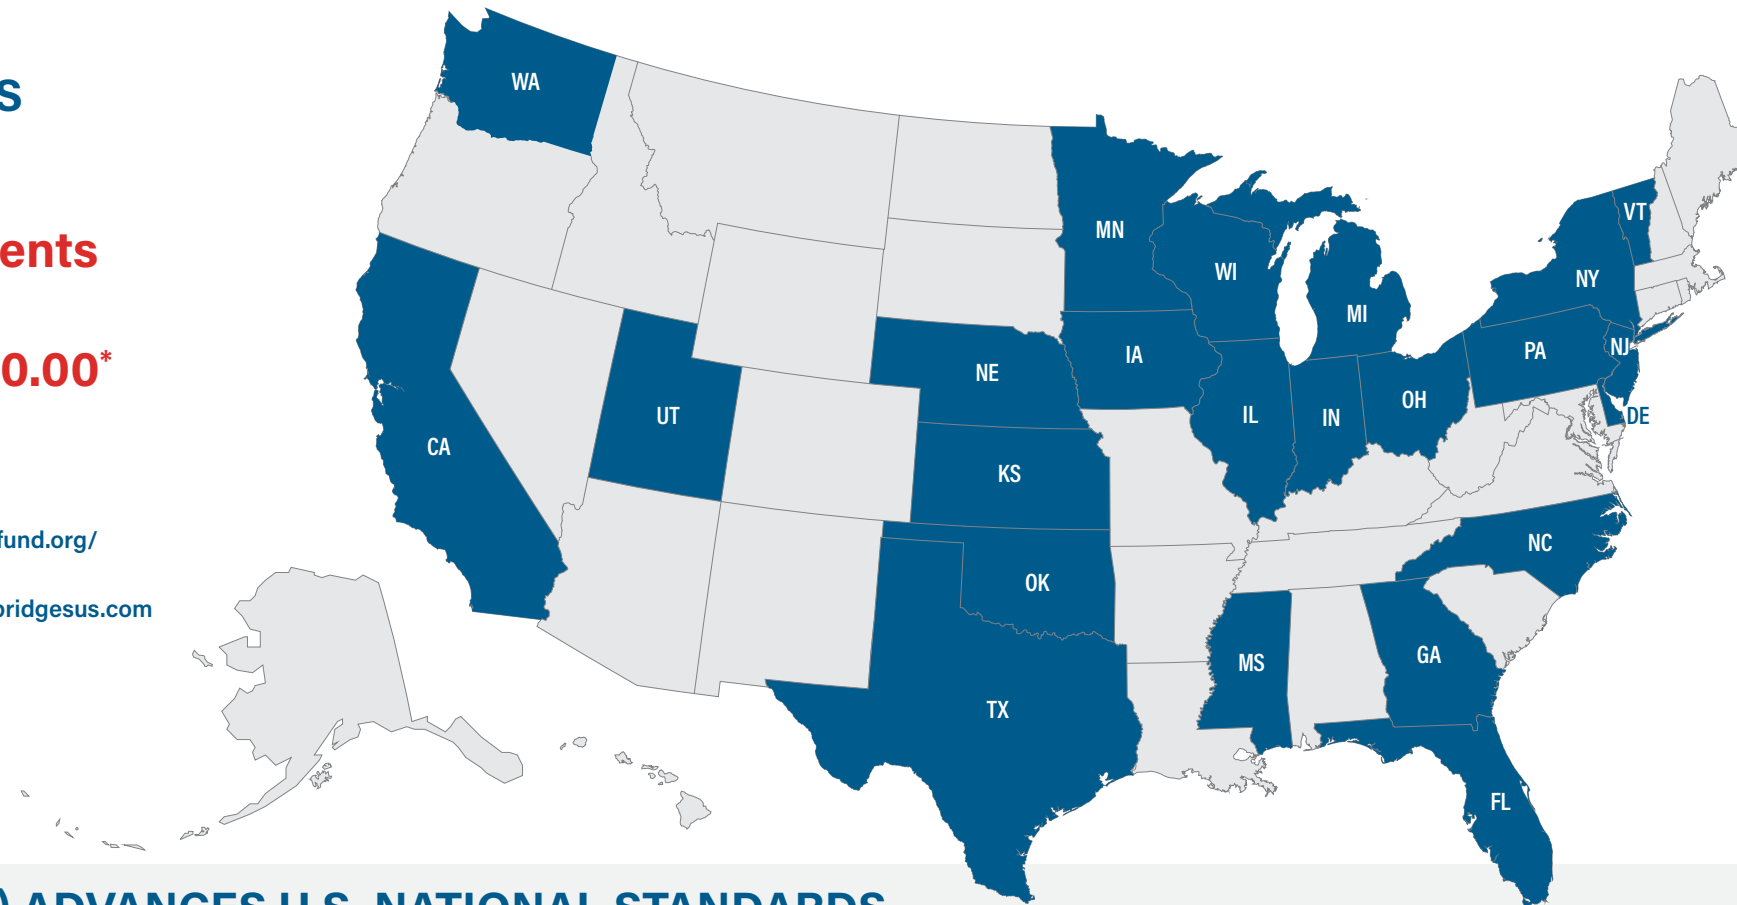

PROJECT SPONSORS

Total Commitments Received:
\$2,080,000.00*

*As of October 2020
